

JADOC Satellite Site

- Existing JADOC Satellite Site is located adjacent to the southwest corner of the airfield and must be relocated to accommodate the footprint of the proposed PAR Complex.
- The Air Force has identified one acceptable site for relocation of the JADOC Satellite Site, located in the northeast area of JBA, between New Hampshire Avenue and the Base boundary (inset figure).
- This location was formerly a housing area with buildings and paved parking areas, but currently consists of trees and sloping topography with several streams.
